Solutions from a single source

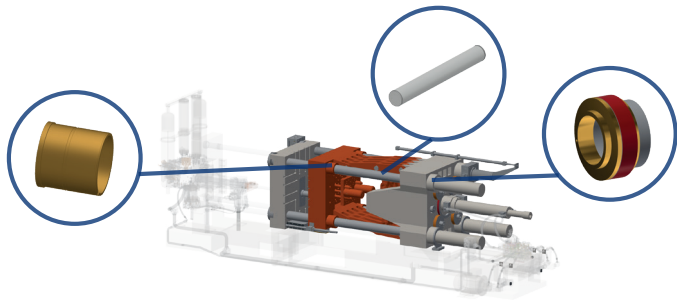

## DCM OVERHAULING WITH MODERNISATION

With more than 25 years of experience in the industry, our company is leveraging its expertise to enhance the overhauling and modernization of Die-Casting Machines (DCMs). The process involves replacing the injection systems, closing blocks, and valves.

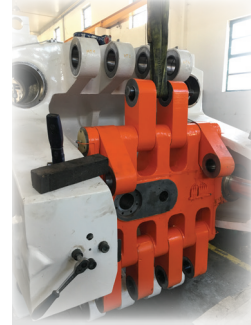

We are proud to partner with PARKER Hannifin on this project, a collaboration that presents a great opportunity for the future. Additionally, our services include the purchasing of donor DCMs.
