

Öntőgépszerviz Kft.

SOLUTIONS FROM A SINGLE SOURCE

ON-SITE MACHINING

MOBILE PLATE WELDING

MOBILE MILLING

MOBILE INLINE DRILLING

Mobile line drilling / welding

With our machine, we can undertake heavy duty loader machines and other on-site boring tasks, including pre-welding the hole to restore it to its original condition or we can pre-manufacturing the necessary bushes at our machining workshop.

Our equipment is available in the following size ranges

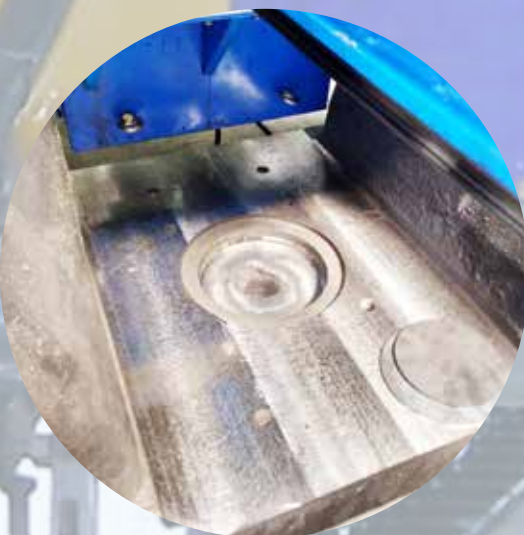

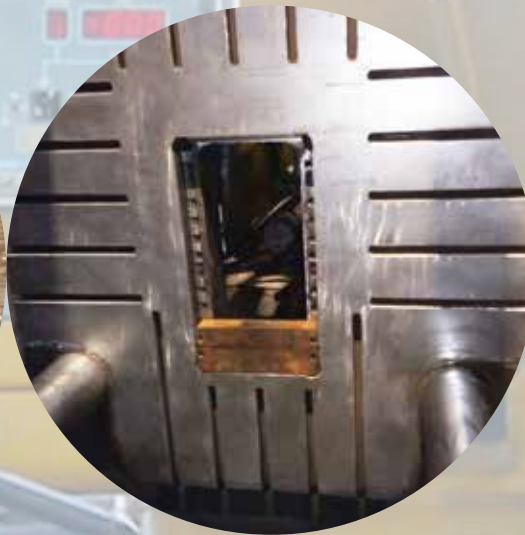

- In line boring: d52 mm - d450 mm
- Internal diam. line welding: d52 mm - d450 mm
- External welding: d20 mm - d250 mm

Mobile milling and mobile plate welding

With the indication of the industry, our Company has produced two self-developed mobile milling equipment.

We are available to our Customers in two size ranges.
For 350t-1350t and 1350t-4200t closing die-casting machines
and forging presses (friction, eccentric) up to 600t-2500t.

The too many milling gave us the idea to develop mobile plate welding,
which can be used to machines plate welding with max. 2200t closing
force.

Öntőgépszerviz Kft.

1211 Budapest, Duna Lejáró 1. Hungary

- The Öntőgépszerviz Kft. (Die Casting Machine Service Ltd) is specialised for maintenance, service, overhauling and modernization of hydraulic, mechanic and electric, industrial equipment especially of Die Casting Machines.
- With our trained and qualified engineers and technicians we have been serving our client more than 15 years.
- Our primary activity is to provide complete service including mechanical, hydraulic and electrical overhauling (whole or partial), maintenance (periodical or occasional) and modernization for industrial production machines or equipment.
- We have our own special solution like mobile milling or injection unit tester.
- Our advantage is our quick and flexible response to our customers' needs and request. These are helped with our highly qualified and experienced staff (65 people), and we use 21 fast responding service cars equipped for wide applications.
- We have an up-to-date business partner network in Hungary and throughout Europe which helps to supply our customer with spare parts for die casting machines and peripherals.
- Our workshop (7.100 m²) is equipped with a 30t hall crane, a hydraulic service area, a painting and washing facilities, assembly hall, where we can solve all the working processes like assembly, milling, welding, metalwork, painting and all of the above are supported with a full equipped hydraulic spare parts shop and warehouse.
