SOLUTIONS FROM A SINGLE SOURCE

MOBILE INJECTION TESTER

We recommend you our testing equipment to control set and diagnose the casting parameters of your casting machine.

Check the injection parameters of your DCM's to reduce the rate of refuse with our service.

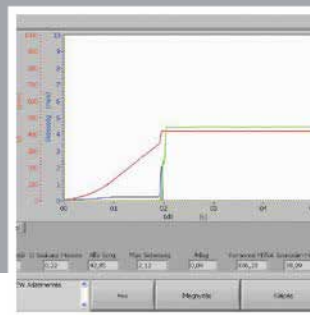

With the help of our tester you are going to have a detached view about the technical state of your DCM.

Flexible equip cord position sensor to control the speed.

Pressure sensor to measure the pressure in the injection cylinder.

The diagram is indicating the machine's pressure and speed relations exactly and gives data about the machine's particular settings.

If you don't know us yet...

The Öntőgépszerviz Kft. (Die Casting Machine Service Ltd.) is specialised for the maintenance and service of hydraulic, electrical and casting machines. We have been serving our clients since 2001 with our trained and qualified staff. Our primary activity is to give complete service (including mechanical, hydraulic and electrical maintenance) for industrial companies working with die casting machines. We offer monthly or annual maintenance, occasional quick service, minor and mid repair works or complete renewal. Our strength is fast responding to customer needs: our nine, fully equipped service vans and fifteen technicians are at the

disposal of our customers. We maintain an up-to-date network of Hungarian and international contacts, so we can get support and supplies rapidly, even from abroad. In our workshop, we produce and manufacture various types of hydraulic equipment, according to the customer's requirements. We hope you will visit us and become our customer!
